

Alcoholism, drug addiction and mental illness are real medical conditions that can affect anyone. Recovery is possible with the right services and supports funded by the ADM Board.

The ADM Board is responsible for seeing that effective and affordable treatment and prevention services are available in Summit County for adults, teens and children with mental illness and/or alcohol or other drug addiction. Contracts with local agencies ensure state of the art services and supports are available for individuals and families at critical times in their lives.

With leadership provided by a local board of directors, the ADM Board assesses needs, plans services and evaluates their impact. Through the support of a local property tax levy, the ADM Board provides opportunities for recovery and hope for a better life.
