The message of hope is powerful, and it’s at our lowest times where hope is so critical. Often when a person enters the ADM System, we meet them where they are – *hopeless and desperate for help*. Once engaged, we can witness the true transformation that occurs when someone is in recovery.

From preventing drug abuse and suicide in young people, to providing effective treatment to those suffering from addiction and mental illness, programs funded by the ADM Board save lives every day - impacting more than 50,000 people per year. We work to engage and partner with individuals, families and organizations across all sectors of Summit County to find solutions that benefit our community.

We are here for people in all phases of life, from young children to senior citizens. Our provider agencies are the best at what they do and ready to help. Not only do we want to see people recover from their illness, we want the people we serve to *recover hope*— so they can see their lives beyond today and imagine a happy and healthy future.

We encourage you, the community, to join us, stay engaged and support hope.

André Thornton, Jr.
ADM Board supports a client-centered system, focused on comprehensive treatment and recovery management that recognizes many paths to healing and recovery.

MENTAL HEALTH SERVICES
Mental illness makes up more than 70% of all the people served in our system and can take many forms, from mild depression to more serious and persistent conditions like bipolar disorder. Programs include residential and respite services, psychiatric and medication management, partial hospitalization, outpatient counseling and case management and homeless outreach.

10,000+ people served through our 24-hr crisis services + hotline

PREVENTION
The ADM Board spent over $3.2 million on prevention in 2018. We believe in the value of prevention, early intervention and health promotion to halt or reduce the impact of mental illness and addiction. Our prevention programs are county-wide and target individuals and families at every stage of life. Additionally, our targeted mini-grants awarded over $52,000 directly to school districts to enhance in-school prevention efforts.

125 schools in 17 school districts participated in prevention

ADDITION SERVICES
Addiction is a disease that can happen to anyone, and the consequences of addiction are the same irrespective of the drug of choice. The ADM Board funds many different programs to help people recover from addiction. Programs include inpatient and outpatient withdrawal management, ambulatory withdrawal management for adolescents, residential treatment, medically assisted treatment, outpatient counseling and case management, sober housing and peer support.

1,100+ visits from Quick Response Teams; 45% sought treatment after a visit

RECOVERY SUPPORTS
These services help people find the extra supports they need to maintain and enhance long-term recovery. Recovery supports include: peer recovery coaching, Choices Social Center, employment services, supportive housing programs and more. Harm reduction also plays an important role in the health and safety of the community. Through education and harm reduction strategies with local municipalities, law enforcement and our healthcare partners, we have made an impact on overdose deaths in our area.

63% reduction in deaths due to opiate overdose since 2016

For a list of our contract providers and community partners visit admboard.org.
Our local levy represented 75% of our funding in 2018.

We are extremely grateful to the Summit County residents who so generously support the ADM Board with their tax dollars. Together, we ensure a healthier, more hopeful future for all.
